Affordable Zero
Energy Buildings

This project has received funding from
the European Union's Horizon 2020
research and innovation programme
under grant agreement No 754174

SINFONIA is a Smart Cities project that aims to
deploy large-scale, integrated and scalable
energy solutions in mid-sized European cities by
combining the retrofitting of more than 100,000 m²
of living surface, optimisation of the electricity grid,
and solutions for district heating and cooling.
